1. Brief Introduction

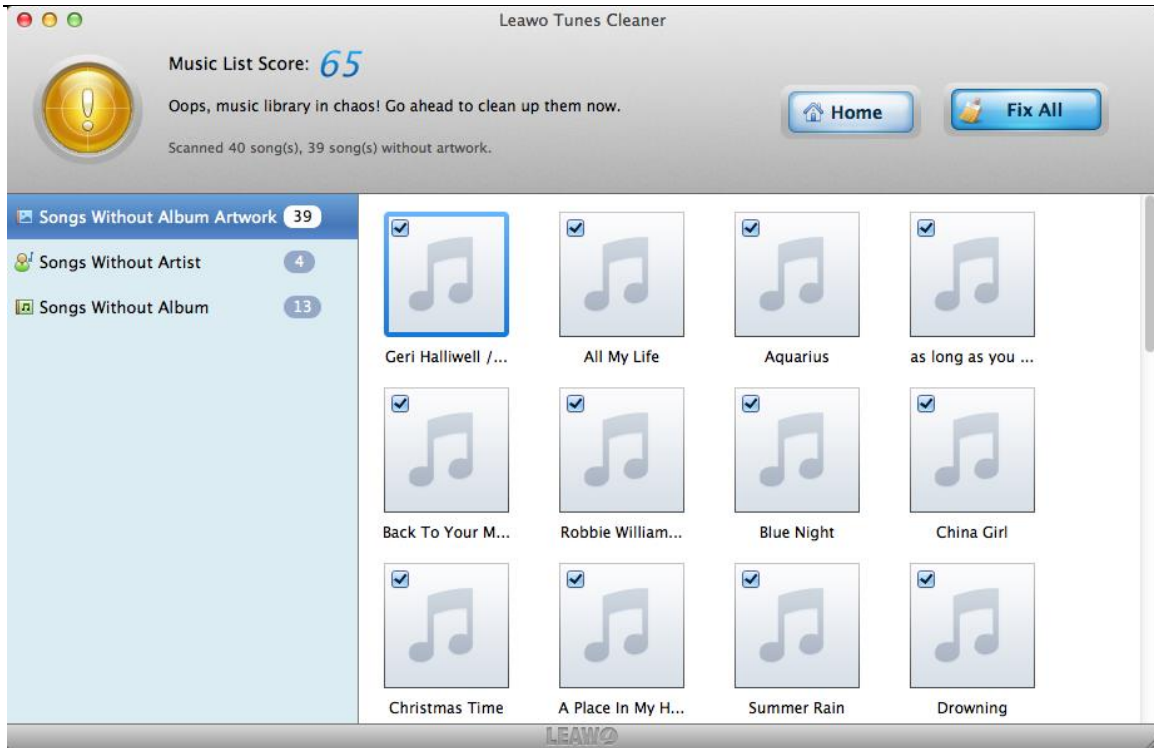

On the main interface of Leawo Tunes Cleaner for Mac, you can see 4 entries: **Start to Clean iTunes**, **Open Music Files**, **Clean-up Duplicates**, **Load Saved Result**.

1.1 Start to Clean iTunes

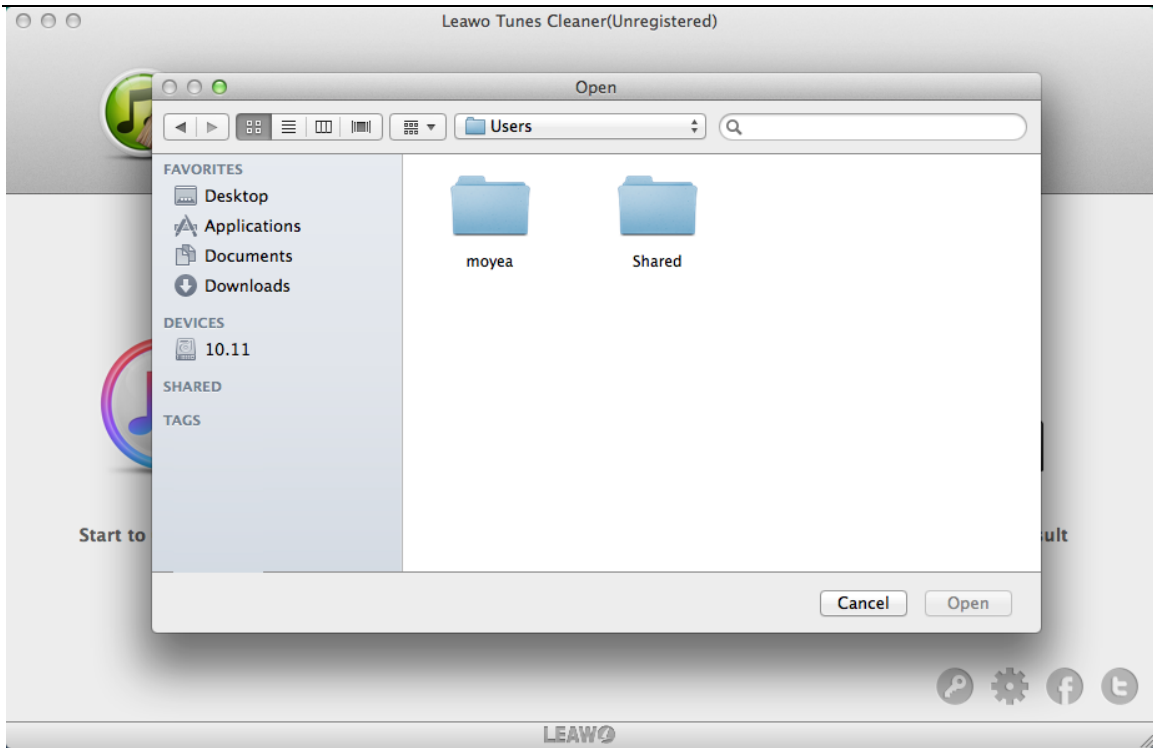

Click **“Start to Clean iTunes”** entry to clean iTunes libraries. You can fix the media files without album artwork, artist, and album with ease.

1.2 Open Music Files

For local music files, the cleaner program can complete the same work as cleaning iTunes

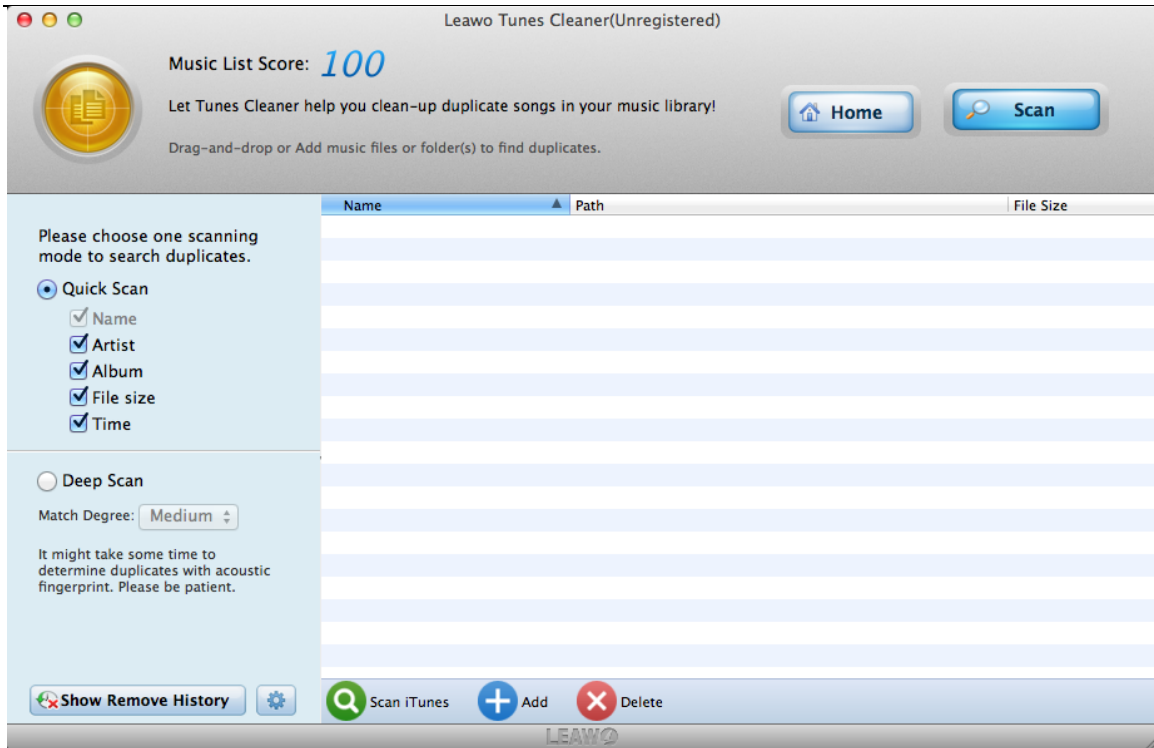

libraries with simple clicks. Just click “**Open Music Files**”  entry to approach it.

1.3 Clean-up Duplicates

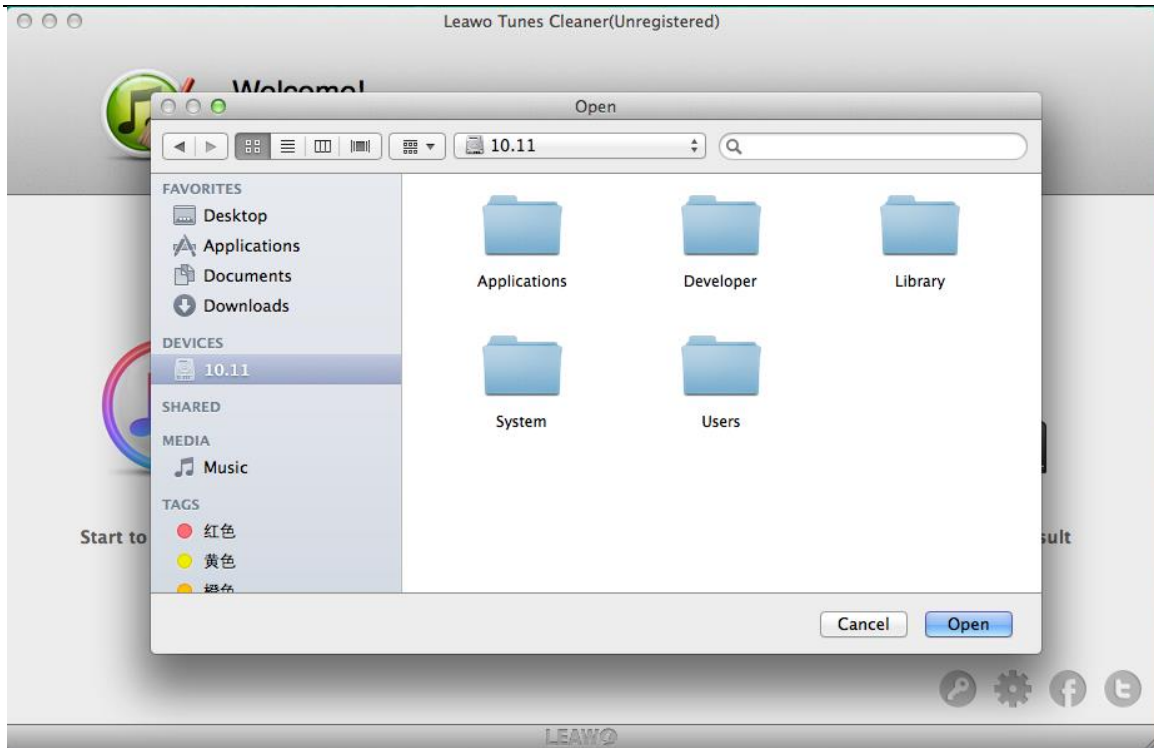

Clicking “**Clean-up Duplicates**” entry will help you to remove the duplicate music files. You could add iTunes or local music folders to clean up with ease.

1.4 Load Saved Result

In some cases that you want to fix music files later and save the fixing result temporarily, thus

you can continue to fix them through clicking “**Load Saved Result**”  entry and loading unfixed projects.

1.5 Edit

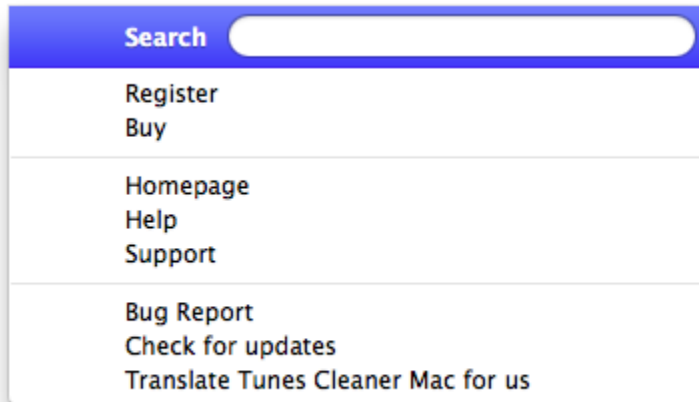

There are 5 options in the **Edit** menu: **Pause**, **Continue**, **Save Project**, **Start Dictation**, and **Special Characters**.

- Pause**: click to pause the operation for music files.
- Continue**: click to continue your operation.
- Save Project**: click here to save unfixed result for future fixing.
- Start Dictation**: use your voice to enter text.
- Special Characters**: input emoji, accents, and symbols.

1.6 Help

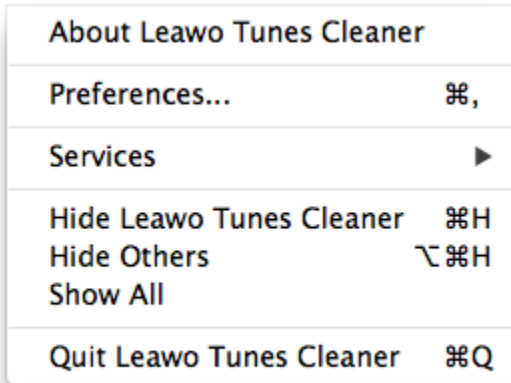

There are 8 options in **Help** menu: **Register**, **Buy**, **Homepage**, **Help**, **Support**, **Bug Report**, **Check for updates**, and **Translate Tunes Cleaner Mac for us**.

- a. **Register**: once users pay for the software, they will get the registration code, and then users could register the software by clicking this option.
- b. **Buy**: you could click here to visit the official purchase page of Leawo Tunes Cleaner for Mac and purchase it.
- c. **Homepage**: link to the home page of Leawo Tunes Cleaner for Mac.
- d. **Help**: link to user guide page of Leawo Tunes Cleaner for Mac.
- e. **Support**: link to the support page of Leawo Tunes Cleaner for Mac.
- f. **Bug Report**: If you find bugs when using the software, you could send the bug report to Leawo Software.
- g. **Check for Updates**: check for the latest version of the software and update it.
- h. **Translate Tunes Cleaner Mac for us**: link to the translation page of Leawo Software. We are looking forward that you are willing to help us translate our products' UI language into your language.

1.7 Leawo Tunes Cleaner

Step 4. Launch Leawo Tunes Cleaner on Mac, then choose "Help > Register" option on the menu

or click the key  button at the right bottom. Enter the registration code in the pop-up

panel and click "Register"  to finish the registration.

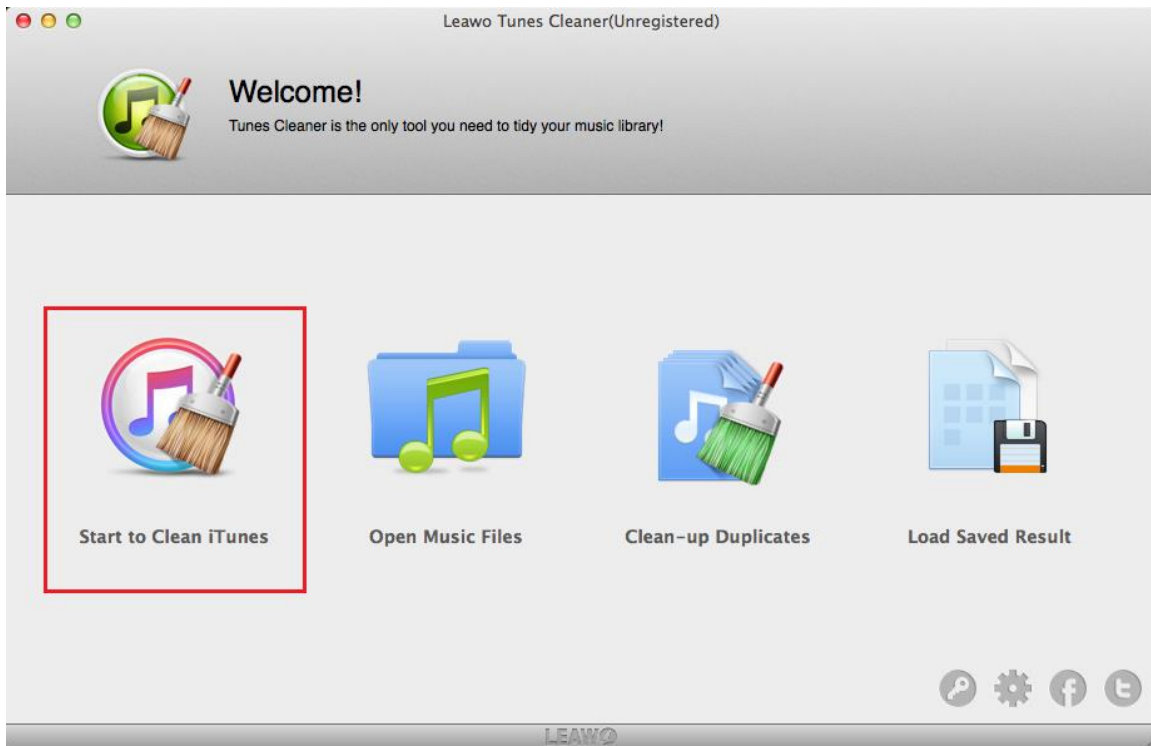

3. How to Clean up iTunes Music Library

Step 1. Choose Start to Clean iTunes Entry

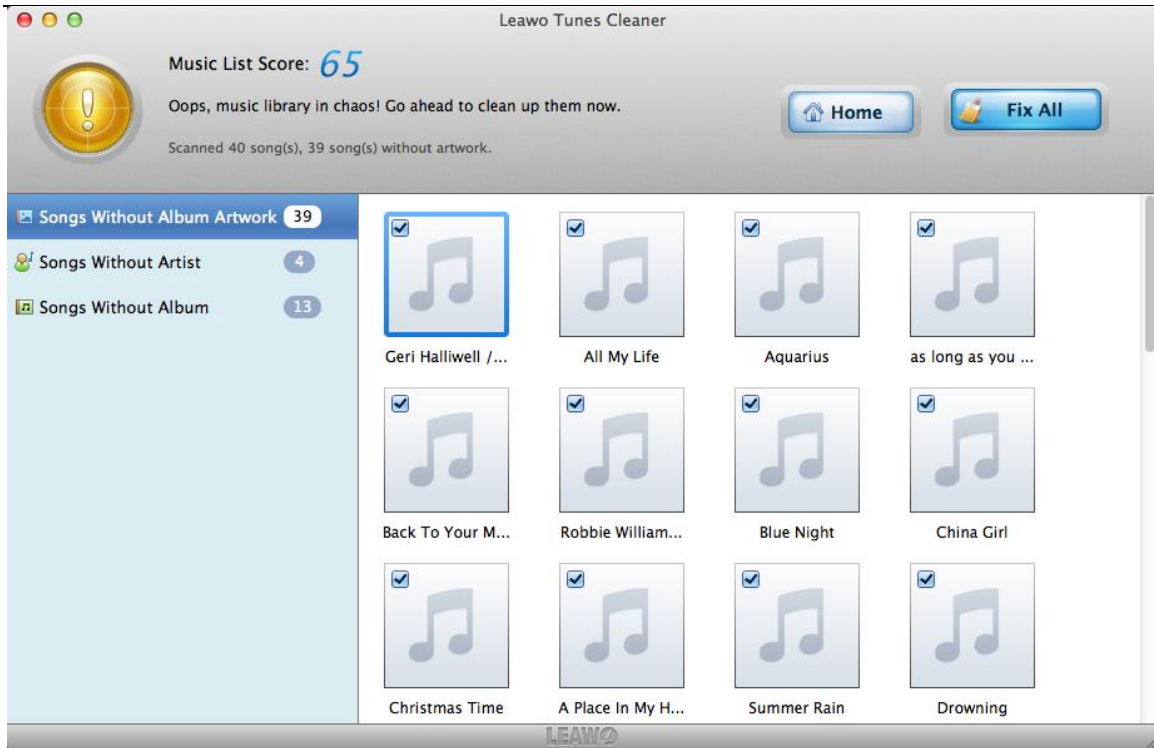

Run Tunes Cleaner for Mac and click “**Start to Clean iTunes**” entry to scan iTunes music library.

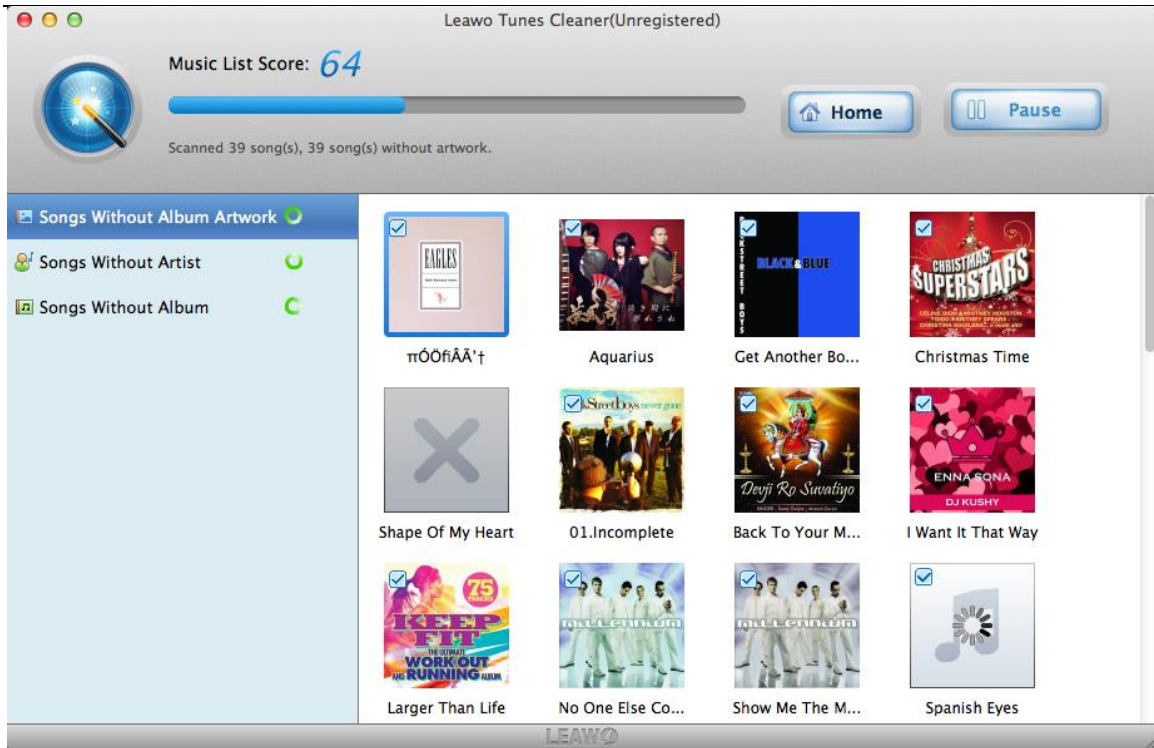

Step 2. Scan Music Files to Fix

The software will scan iTunes music files automatically. With it done, all music files with different problems will be displayed in specific categories at the left sidebar. You can choose

each file to fix or just click “**Fix All**”  button to fix all music files at a time.

Fixing progress may take some time. So you could click "**Pause**"  button to pause fixing during fixing.

Step 3. Apply Fixed Music Files

With fixing done, you can simply click “**Apply**”  button to apply the fixed result. Moreover, you can fix some unrecognized songs manually. In addition, if you don’t want to fix the result right now, just choose “**Edit > Save Project**” in the program menu to save unfixed music files for next fixing.

4. How to Clean up Local Music Files

Step 1. Choose Local Music Library Entry

Run the software on Mac and in the main interface, choose **“Open Music Files”**  entry to clean up local music files.

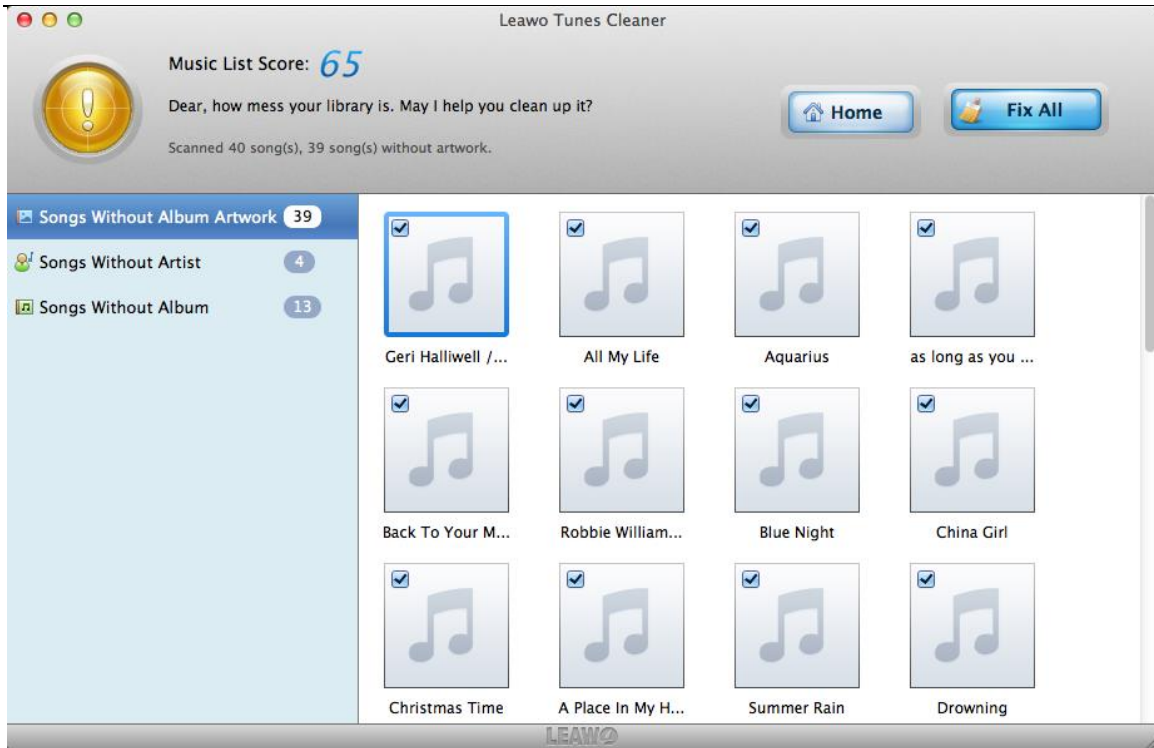

Step 2. Fix Music Files

Scanning progress will start automatically and with it done, all problematic music files will be displayed in specific categories for you to fix. You could check each file for fixing or simply click

“Fix All”  button to fix all music files. During fixing, you could click **“Pause”**

 button to pause fixing.

Step 3. Apply Fixed Music Files

After all music files have been fixed, you could click "**Apply**"  to apply fixed music files to its original library or click "**Edit > Save Project**" in the menu to save unfixed music files for future fixing.

5. How to Fix Music Tags Manually

In general, the music tags will be downloaded to complete music info automatically after fixing. But for the **Unrecognized Songs**, you may need to edit their tags manually. Just choose the songs and the music tags area will show up at the bottom. You can personalize music tags such as **Name**, **Artist**, **Album**, **Year**, and **Genre**. After completing the editing of music tags, click **Apply**

button to apply the fixed result.

The screenshot shows the Leawo Tunes Cleaner interface. At the top, it displays a 'Music List Score: 99' and a congratulatory message: 'Congrats! Your library looks great now. You can apply all the results now.' Below this, it states 'Fixed 38 song(s), 54 problem(s). Still 1 problem(s) not fixed.' There are 'Home' and 'Apply' buttons.

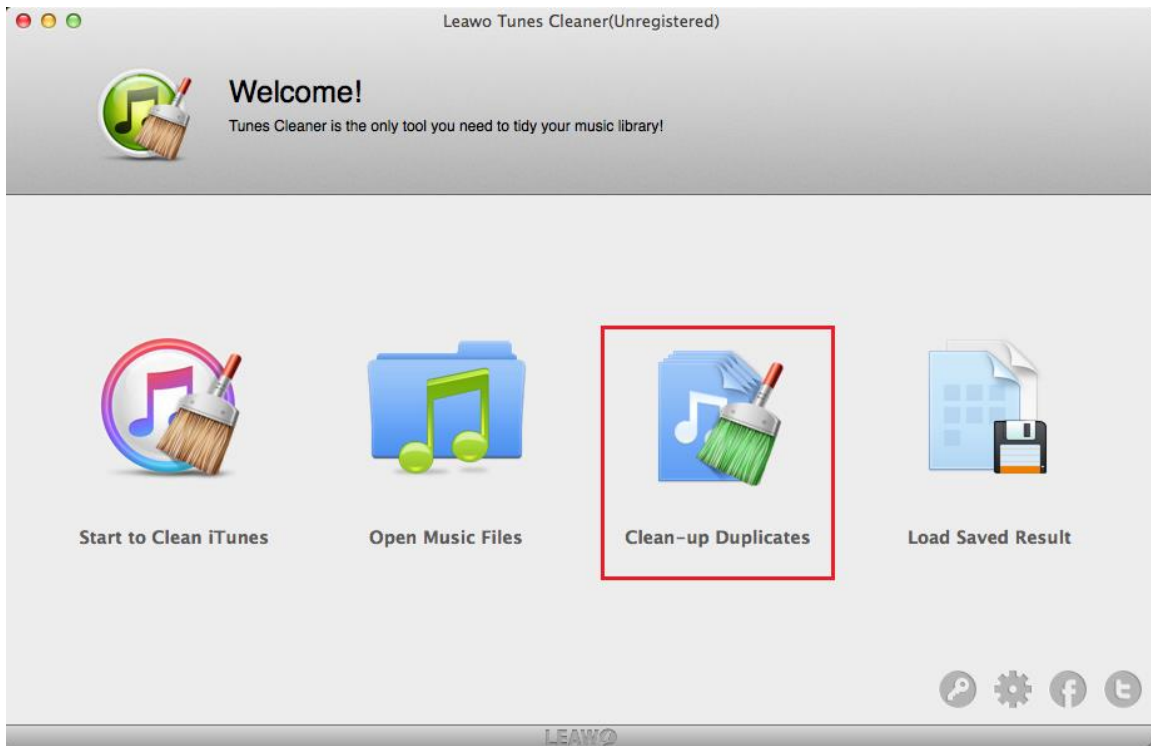

The main area shows a list of 'Unrecognized Songs' with a count of 1. The selected song is 'Shape Of My Heart' by Backstreet Boys, from the album 'Black and Blue ...'. The interface shows the 'Original Tag' and 'New Tag' sections. The 'Original Tag' shows 'No Artwork Available' and the following metadata: Name: Shape Of My..., Artist: Backstreet Boys, Album: Black and Blu..., Year: 2000, Genre: R&B. The 'New Tag' section shows a play button icon and the following metadata: Name: **ape Of My Heart**, Artist: Backstreet Boys, Album: Black and Blu..., Year: 2000, Genre: R&B. The 'New Tag' section is highlighted with a red box.

6. How to Delete Duplicate Songs

Step 1. Choose Clean-up Duplicates entry

Launch Tunes Cleaner for Mac and choose “**Clean-up Duplicates**” entry to clean up the duplicate music files.

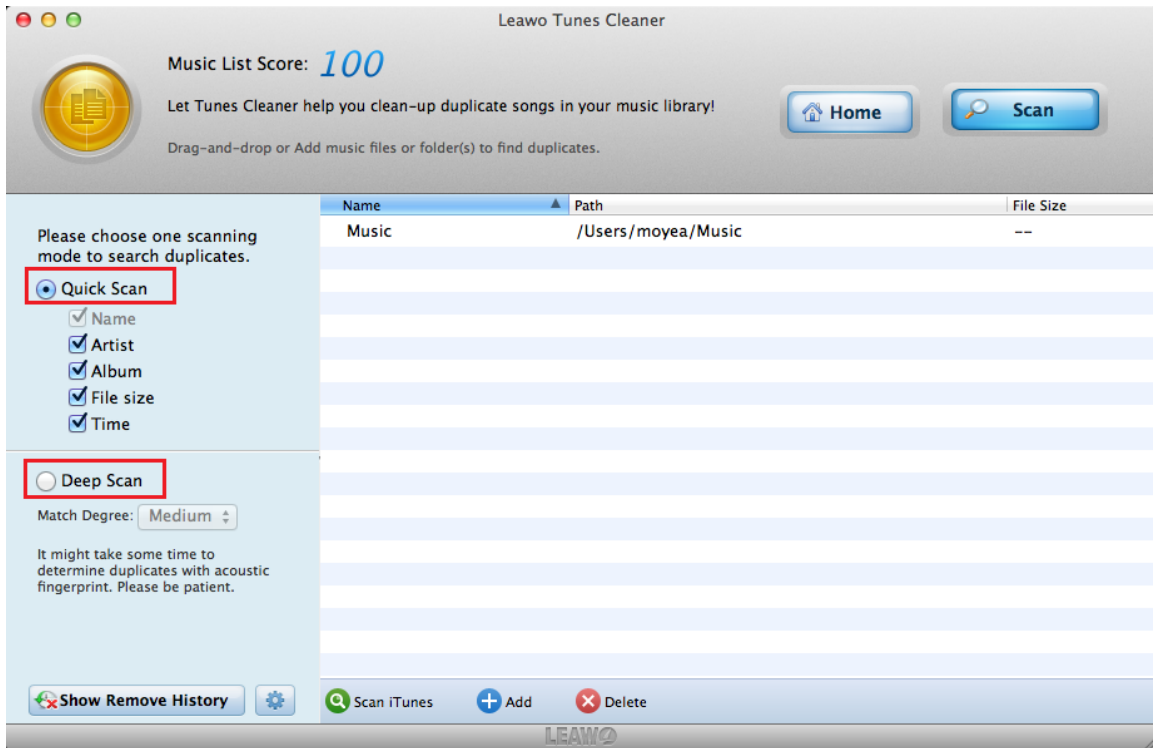

Step 2. Choose One Scanning Mode

At the left sidebar, you can see 2 duplicates scanning modes: **Quick Scan** **Quick Scan** mode and **Deep Scan** **Deep Scan** mode. **Quick Scan** mode just searches the duplicate songs through **Name**, **Artist**, etc. However, **Deep Scan** mode will analyze acoustics fingerprint of songs

and you need to choose **Match Degree** to **Low**, **Medium**, or **High**.

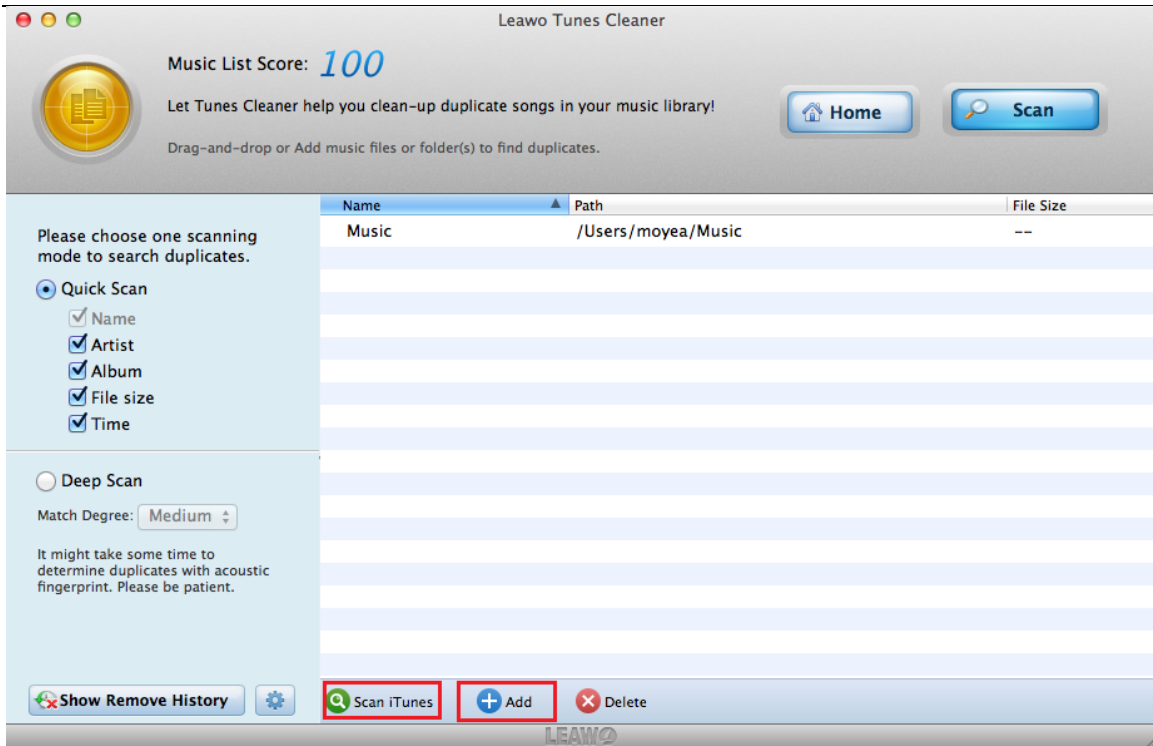

time spent to scan will increase as the match degree increases. Finally, select one of them to scan duplicate songs on your demand.

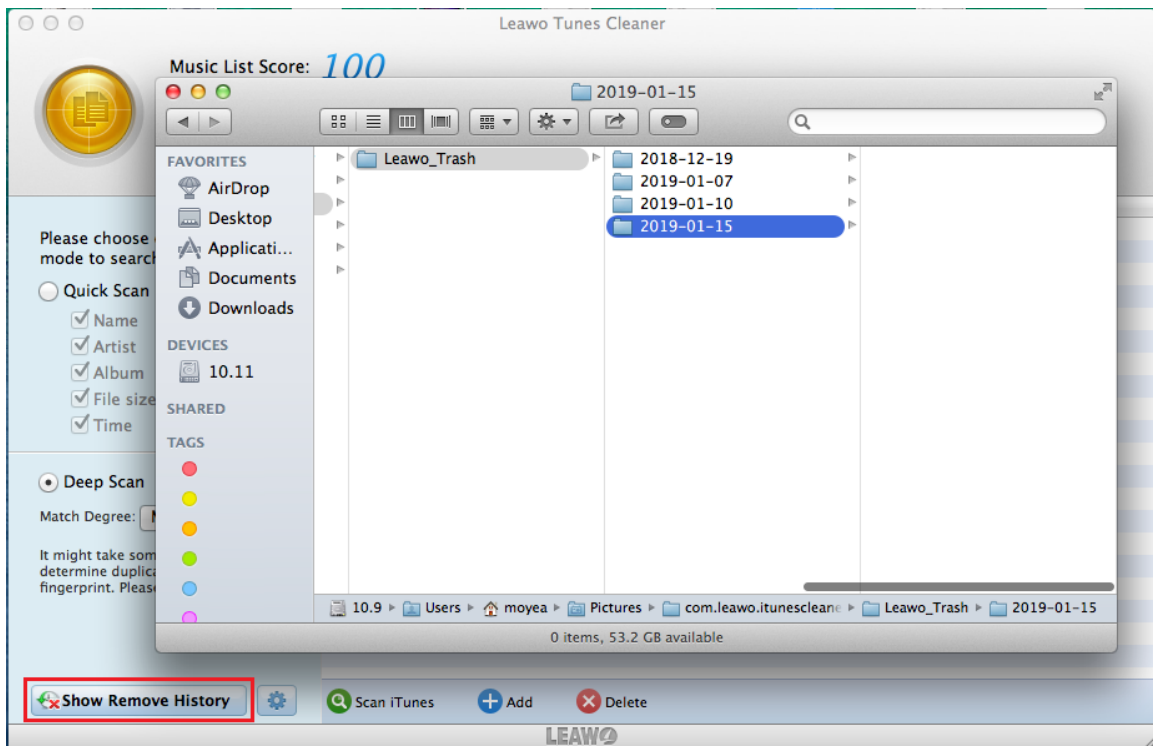

Step 3. Add Music Files for Duplicates Removing

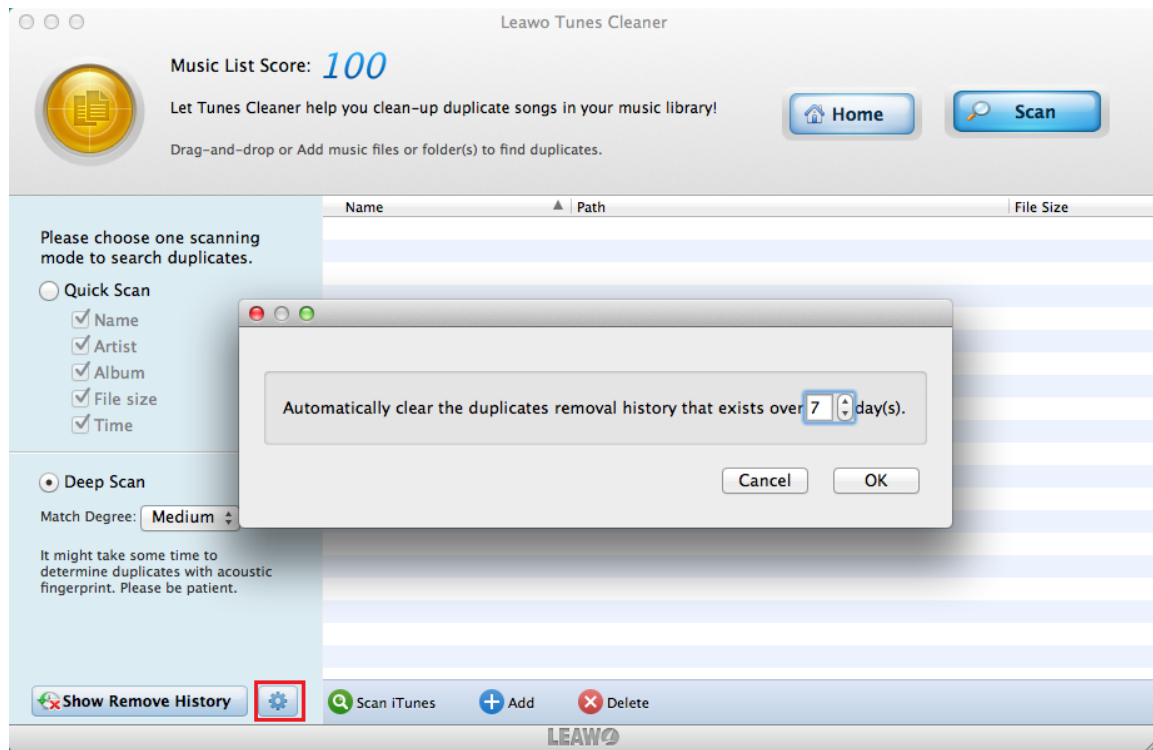

After choosing scanning mode, you need to click “Add”  button to add music files to remove duplicates or click **Scan iTunes**  button to remove duplicate songs in iTunes. However, click **Delete**  button could delete the music folder that you added. Moreover, the software supports to drag music files from local folder to it directly.

In addition, you could click “**Show Remove History**”  button to find back the duplicate music files deleted recently. But it will only be kept for the preset number of days.

And you can click the gear  button to set the time span for clearing the duplicates removal history.

Step 4. Start Deleting Duplicates

Click “Scan”  button to begin scanning duplicates in added folders or iTunes library. Then all duplicates will be displayed and selected clearly. You could remove the

duplicates as suggested through clicking **Remove**  button or select manually as you wish. In addition, you can choose certain song and click the right deltoid  button to play directly, while click the folder  button to locate the selected file in the file management program on Mac.

Leawo Tunes Cleaner

Music List Score: **62**

Duplicates found. Let me help you remove them and keep your library clean.

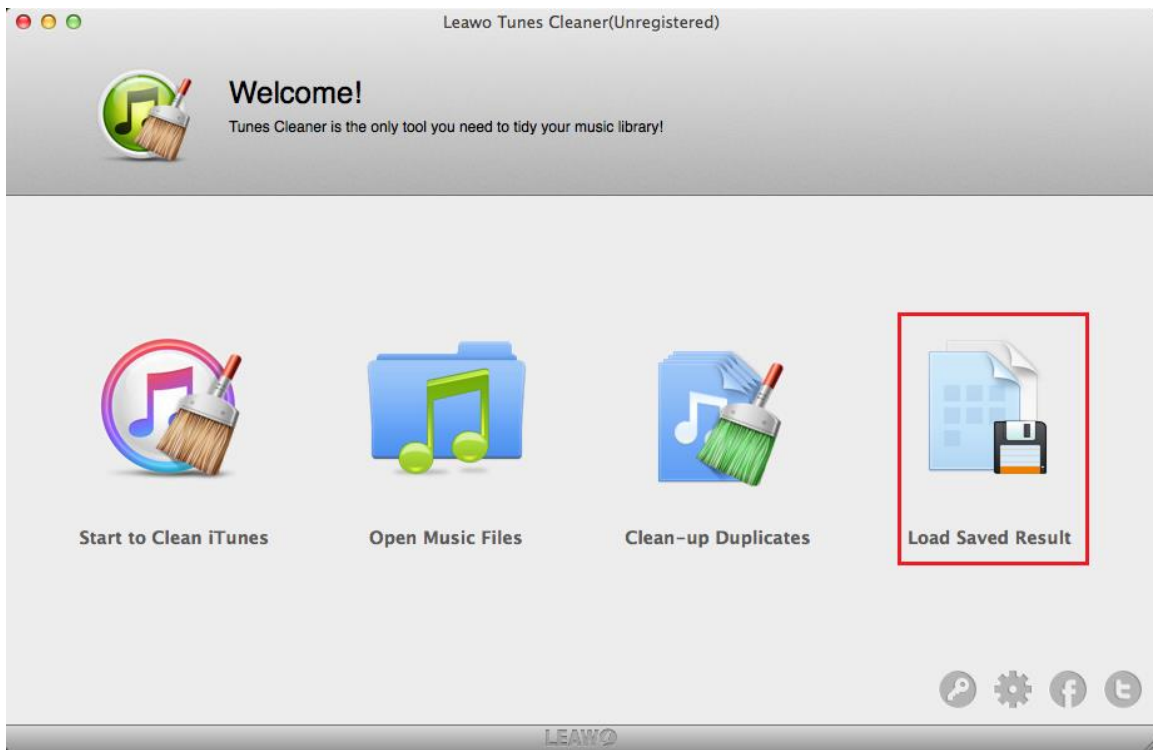

Scanned 716 song(s), found 272 duplicates.

7. How to Load Saved Result to Clean up

Run the software and choose “**Load Saved Result**”  entry to clean up again from the saved result.

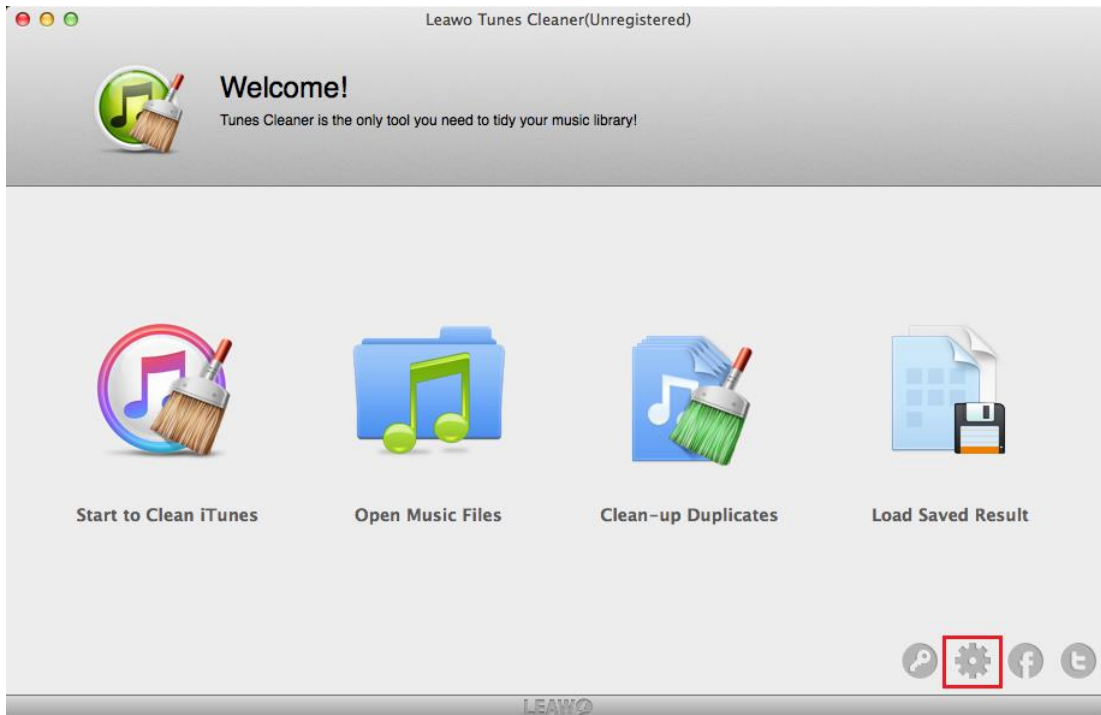

Then there will pop up a file management window and you can choose one saved result file. In general, the saved result will be saved in leawodata format. After loading the file, you can continue to finish the previous cleanup progress.

8. Leawo Tunes Cleaner for Mac Preferences

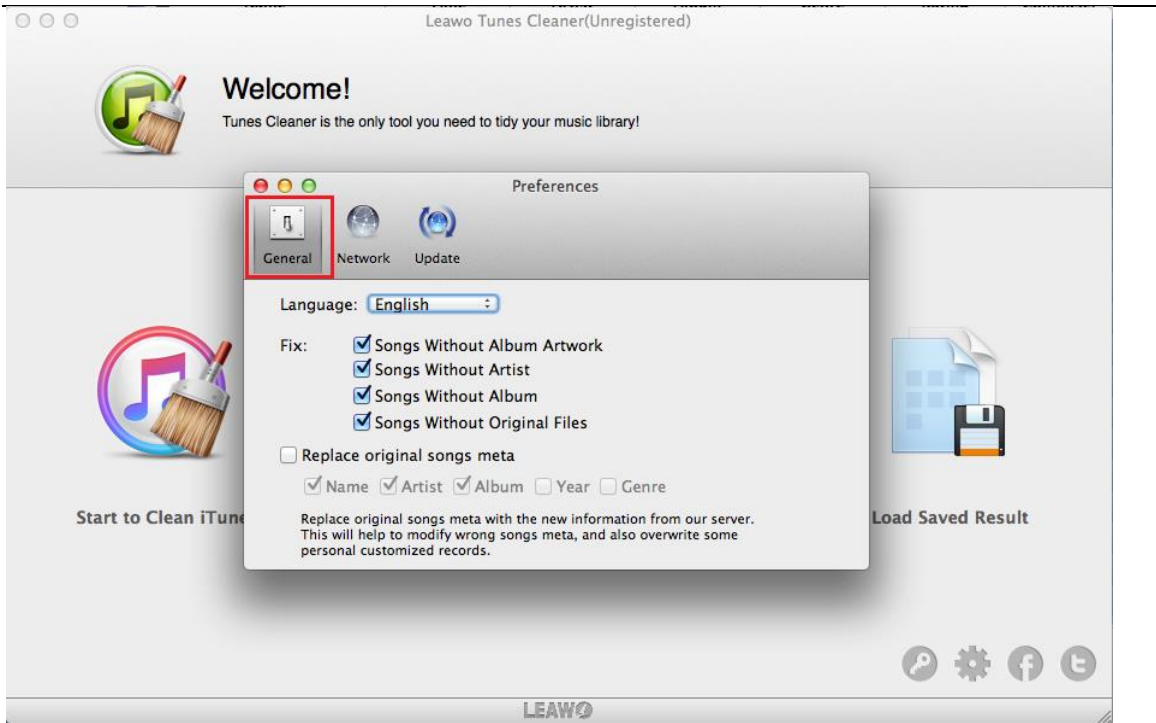

Run the software and at the right bottom of the main interface, you can find a gear button. Then click on it to open the preferences panel.

8.1 General Preferences

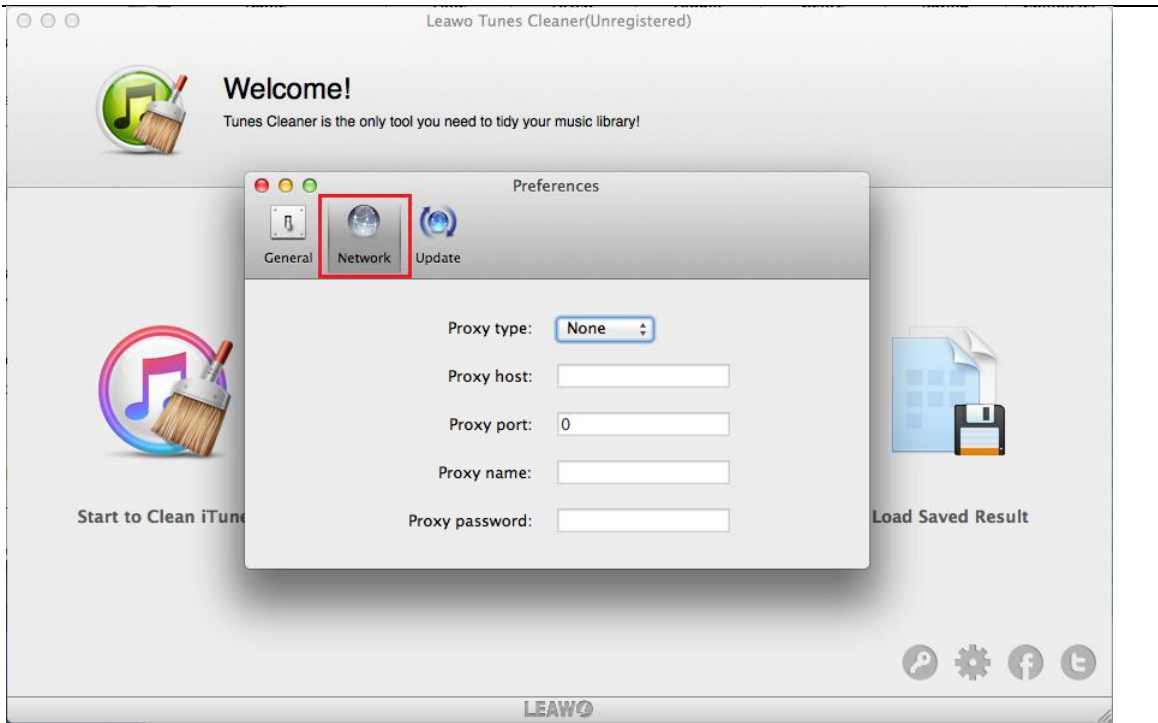

Click and choose the “**General**” tab. There you can change the interface language and choose which kinds of music files to fix like songs without album. Moreover, you can pitch on **Replace original songs meta** option to update songs meta with the newer information from our server.

8.2 Network Preferences

Select the "Network" tab if you want to use the software with the proxy. You need to write down your **Proxy type**, **Proxy host**, **Proxy port**, **Proxy name**, and **Proxy password**.

8.3 Update Preferences

Select the "**Update**" tab, you could enable automatic update check and set the update frequency.
