1. Brief Introduction

Below is the main interface of Leawo iTransfer for Mac:

1.1 iOS device

Run Leawo iTransfer for Mac and connect your iOS device to Mac. Then the software will detect your device automatically and after that, the detailed information of your device will display on the main interface. In the left sidebar, click the iOS device, then the **LIBRARY** and **PLAYLIST** of the device will display for you to manage files of iOS device.

	🔗 Leawo ITransfer
iPhone ○ IBRARY PLAYLIST ○ ⑦ ITunes	iPhone Type: iPhone Capability: 59.59 GB Version: 12.1.1 Serial Number: F17RVZTCH2X
	JailBroken: No 18.37 GB Songs 134.75 MB OKB Photos 0 KB Apps 15.77 GB Books 3.41 MB 1.47 GB
	LEAWO

1.1.1 LIBRARY of iOS device

Click **LIBRARY** under the iOS device in the left sidebar, then all kinds of files libraries in iOS device will be listed here, including App, Bookmarks, Books, Camera, Contacts, Movies, Notes, Photos, Podcasts, Ringtones, SMS, TV Shows, and USB Storage.

1.1.2 PLAYLIST of iOS device

Click **PLAYLIST** under iOS device in the left sidebar, the playlists in your iOS device will be listed here, such as history, downloaded, created by yourself and you can manage them with ease.

1.2 iTunes

Same as iOS device, your iTunes files will be scanned automatically by the software and click **iTunes** in the left sidebar, there will show **LIBRARY** and **PLAYLIST** two options for you to manage iTunes files.

	🧬 Leawo ITransfer

	Songs Movies Photos Apps Books Others 134.75 MB 0 KB 0 KB 16.77 GB 3.41 MB 1.47 GB
	LEAWO

1.2.1 LIBRARY of iTunes

After clicking "**LIBRARY**" option under **iTunes**, you will see all files on your iTunes, including App, Books, Movies, Music, Podcasts, Ringtones, and TV shows.

1.2.2 PLAYLIST of iTunes

Click **PLAYLIST** under **iTunes**, all of iTunes playlists will be listed here and you can create, delete, and rename playlists as well as add songs to the playlist.

1.3 File

The "File" File menu includes options: Add, Delete, Preview, Transfer to, Playlist, Eject Device.

Add: add files and folders from Mac to iOS devices or iTunes libraries. Choose "Add >Add File" to add files from Mac to iOS devices or iTunes; or "Add > Add Folder" to add a folder of the certain kind of files to iOS devices or iTunes.

Add File

b. **Preview**: preview the content of media files. Choose a file and click "**Preview**" in the menu, a small preview window area at the left bottom will show up to play the selected file.

c. **Delete**: delete files in iOS devices or iTunes. Choose files you want to delete and click "**Delete**", then the selected files will be deleted.

d. **Transfer to**: transfer files among Mac computer, iTunes, and iOS devices. Choose files you want to transfer, then click "**Transfer to**" and choose where to transfer the files to. A window will pop up where you can choose the location of saving.

My Computer	
iTunes	
iPhone	

e. **Playlist**: offer options to manage playlists of iOS devices or iTunes. Choose a playlist at the left sidebar and click "**Playlist**" option. Then choose "**Add Playlist**" to create a new playlist, "**Delete Playlist**" to delete a playlist, "**Export Playlist**" to export a playlist to Mac, "**Import Playlist**" to import a playlist from Mac and "**Rename Playlist**" to rename a playlist.

f. Eject Device: make the software stop scanning the device.

1.4 Edit

The "Edit" Edit menu includes options of "Copy", "Cut", "Paste", "Delete", "Check all" and "Uncheck all".

Copy	ЖС
Cut	ЖХ
Paste	Ж∨
× Delete	
Check All	₩A
Uncheck A	All

a. **Copy**: copy files within the software. You can copy files between iOS devices and iTunes. For example, it allows copying songs from **Music** library to a playlist.

b. Cut: almost like "Copy", but once cut the file, users will lose the file in the original position.

c. **Paste**: once "**Copy**" or "**Cut**" the file, users can "**Paste**" the file within the software.

d. Delete: delete selected files. Choose "Delete" to delete the selected files.

f. **Check All/Uncheck All**: check/uncheck all files in one-click. Choose "**Check All**" to check all files quickly; Or "**Uncheck All**" to do the opposite.

1.5 View

The four options of "**Preview**", "**Table**", "**Cover**" and "**Refresh**" are included in this "**View**" View menu.

a. **Preview**: files can be preview in this view mode. Pitch on "**Preview**", then a small preview window area at the left bottom will show up. Unchecked "**Preview**" will hide the preview window.

- b. Table: show files as table.
- c. **Cover**: show files as cover.
- d. **Refresh**: click this option to refresh your files.

1.6 Tools

The "Tools" Tools menu includes the option of "Refresh Devices".

Refresh	Devices	仓 <mark></mark> ₩F5

a. **Refresh Device**: after transferring files, users can click "**Refresh Device**" to make the software scan the device again. Users can check whether the files being transferred or not.

1.7 Help

The Help Help menu includes options of "Help Topic", "Support", "Feedback", "Check for Updates", "Bug Report", "Home Page", "Register", and "Purchase".

Search
Help Topic Support Feedback Check for Updates Bug Report
Home Page Register Purchase

a. Help Topic: link to the page of Leawo iTransfer for Mac User Guidance.

b. **Support**: link to the support page of Leawo iTransfer for Mac.

c. **Feedback**: send your feedback of Leawo iTransfer for Mac to the company, and they will make improvements according to your feedback.

d. Check for Updates: check for the latest version of the software.

e. **Bug Report**: if users find bugs when using the software, they can send the bug report to Leawo Software.

f. Home Page: link to the home page of Leawo iTransfer for Mac.

g. **Register**: once users pay for the software, they will get the registration code, and then users can register the software by clicking this option.

h. **Purchase**: users can click here to visit the official purchase page of Leawo iTransfer for Mac and purchase Leawo iTransfer for Mac.

1.8 Leawo iTransfer

The "Leawo iTransfer" Leawo iTransfer menu includes options: "About Leawo iTransfer", "Preferences", "Services", "Hide Leawo iTransfer", "Hide Others", "Show All", and "Quit Leawo iTransfer".

- a. **About Leawo iTransfer**: show the version information, support and home page links, and other software information.
- b. Preferences: set up language, proxy and the sources of the software. Under "General" tab, you can choose the language in the drop-down box. Under "Proxy" tab, Users are able to set up the proxy. Under "Sources" tab, you can select what sources to be displayed on the left sidebar and uncheck to hide.
- c. Services: used to make some quick actions.
- d. Hide Leawo iTransfer: hide the software to Dock on Mac.
- e. Hide Others: hide other windows on the desktop apart from Leawo iTransfer for Mac.
- f. Show All: show all windows shown up and hid.
- g. Quit Leawo iTransfer: exit the software.

2. How to Register Leawo iTransfer for Mac

Step 1. Purchase Leawo iTransfer for Mac. You can get access to the purchase page through 2 ways:

a. Visit Leawo iTransfer for Mac <u>official site</u> and click the "**Buy Now**" Buy Now button to enter the purchase page.

b. Click the "Help > Purchase" in the top Help menu of Leawo iTransfer for Mac.

Step 2. Check out the license you want to purchase. There are 2 kinds of licenses for iTransfer for Mac shown below. After that, fill your billing and payment information. After all have been confirmed correct, just submit your order.

1 Year License (1 PC/Mac): the license will be valid within 1 year. One license can only be used on one computer.

Lifetime License (1 PC/Mac): the license is only valid on 1 PC or Mac and updates will be free.

Step 3. Once your order is validated, you will get an e-mail with the content of the registration code. Check your e-mail to get the registration code of iTransfer for Mac.

Step 4. Launch Leawo iTransfer on Mac, then click "Help > Register" on the menu. Enter the

registration code and click "**Register**" Register button to finish the registration.

3. How to Transfer Files from Mac to iPhone

Step 1. Connect iPhone to Mac

You need to connect iPhone to Mac with USB cable and the software will detect your device automatically. Then you can see the information of your iPhone shows on the center of interface, including capability, version, Serial Number, and so on. At the left sidebar, the **LIBRARY** and **PLAYLIST** in your iOS device will be listed there accompanied with the **LIBRARY** and **PLAYLIST** of iTunes.

Step 2. Add files from Mac

There are 4 ways for you to add files or a folder from Mac to iOS device. 1. Just drag and drop files

• • •						🍘 Leawo	iTransfer

Or click the **Transfer** button (the dark-blue right-arrow button at the right bottom of the software) to transfer all files at a time and set destination device to "**Transfer to List: iPhone**" in the pap up window and click **Transfer Now** button

in the pop-up window and click **Transfer Now** Iransfer Now button.

However, if you want to search some specific files, the software offers smart filter function

~	All	
	Name	
	Artist	
	Album	
	Composer	

Stop

Composer on the upper right corner. Users could type the full or partial name of **Name**, **Artist**, **Album**, or **Composer** to choose certain files.

Step 3. Start to transfer files from iTunes to iPhone

With above done, transfer process will begin with a pop-up window to show you the transfer process. It will show the name and number of the files transferring. You can click "**Stop**"

to stop this transfer or just wait it done.

5. How to Transfer Files between iOS Devices

Step 1. Connect both iOS devices to Mac

Run the software and connect both or more iOS devices to Mac. iTransfer for Mac will detect your devices automatically and show the libraries of the devices at the left sidebar. Now you can transfer files between the two iOS devices.

Step 2. Select files and start transferring

Choose any kind of files under LIBRARY and hold Command/Shift key to select certain files, then right-click the selected files and choose Transfer to > iPhone.

8. How to Use iPhone as A Flash Drive

Step 1. Connect iPhone to Mac

Run Leawo iTransfer and connect iPhone to Mac with the USB cable. The software will recognize and detect your iPhone. Under **iPhone** in the left sidebar, click **LIBRARY** and find **USB Storage**.

Step 2. Store files

Click the Add button to add files from your Mac. You can also create a new folder by clicking the New Folder button. You are able to save any kind of files in this library if you have enough storage space.

	24		Apps Books Others 0 KB 3.41 MB 24.73 GB

9.3 Set the sources

Choose Sources Sources tab and select what source to be displayed and uncheck to hide. There are 12 options: Music, Movies, TV Shows, Podcasts, Books, Ringtones, Photos, Camera, Purchased, PlayLists, Contacts, and SMS.

10. Other Options

10.1 Smart Filter

You can click the search button to open the smart filter column (different file types have different filter options) at the upper right corner of the window. Type the full or partial name of the file and click the magnifier icon to search for the file. For example, you are allowed to sort up

the music files with name, artist and so on

10.2 Show as Cover/Show as List

This option is on the left of the smart filter option. You can click "**Show as Cover**" button so that the covers of the files will be shown in the window, or click "**Show as List**" and then the full information of the files will be shown.

10.3 Refresh

After every transferring, the libraries or playlists will be changed right away. But if the files don't

show up in your library, you can click the **Refresh** button to load the files.

10.4 Preview

For media files like music, you will find a "**Preview**" button on the media file. When the view of the software is set to **Preview**, click the button and the media file will be played on the

small preview window area

on the left bottom of the

interface. Or you can right-click the file and choose "**Preview**" in the options.

10.5 Delete

When you want to delete files from your iOS device, you can select the files and click the Delete

X Delete button to delete the files on your device.

10.7 Transfer

Beside the name of each file, there is a transfer 😑 button for transfer. Or when users choose all

files or selected files, they can click the Transfer

button to transfer files.

After clicking the transfer button, users are allowed to change the target folder of the transferred files on the pop-up window.
