## Detailed Guide to register video downloader for mac

### 1. How to Register Leawo Video Downloader for Mac

The following guide will tell you how to get Leawo video downloader for Mac step by step. The way to get registration code and how to activate the program for enjoying more features will all be described in the following.

If you are not satisfied with the trial version that can only download first 5 minutes of the video and want to get more privileges of using this product, you can choose to purchase this product and activate it. There are two cases for you to register in the product. One is for those people who already have the registration code, the other is for those people who don't have the registration code.

#### 1.1 How to activate Leawo Video Downloader for Mac after getting the registration code

You can tap the “**Help**” button to call out the drop-down box which will show “**Activate**” under the search box. After clicking “**Activate**” button, a new window will pop up on the left. You just

need to input the register code and then click arrow-like icon  to activate the full features.

(Activate-the-program)

If you don't have the registration code, click the **"Purchase"** button under **"Activate"** button to get the register code first and then activate the program.

(Purchase-the-program)

## 1.2 How to get registration code

Once you click the **“Purchase”** button, the purchase page of Leawo Prof. Media with your default web browser will pop up. All the built-in modules in Prof. Media will be shown on this page. You can purchase the license of all modules included in Prof. Media or a single module. For purchasing the Video Downloader module, just tap the button of **“1 year”** or **“Lifetime”** besides the title of Video Downloader. And then move the mouse to the bottom of the page and click

**“Check Out Now”** button (check-out-now) to go to the payment page.

## Download online video on Mac

### 1. Step 1: Launch Video Downloader

Feel free to click “**Download**” button on the product description page or other related article. We provide the free trial version for you for one month. After installing the program, you will find it is built in the Prof. Media. The following interface will be showed to you and you can select to enter into the module of “**Video Downloader**”.

Welcome to Leawo Prof. Media. Click preferred function option below to make it work.

(Download-video)

After clicking “**Video Downloader**” and the built-in web browser would be activated and automatically take you to YouTube.com. You can also copy and paste other video sharing website on the location bar to replace it.

(Video-downloader-for-mac)

This program also allows users to change the Home Page to other website by clicking the **“Leawo Prof. Media”** on the top right of the interface and click **“Preference”** to enter into settings. And then click **“Downloader”** button to reset all the relative settings. You can choose to open a blank page or set a specific website as home page. Also you can set the Max download tasks from 1 to 5, the default file location and whether you want to delete the browsing history every time you exit the browser.

(Change-home-page)

If you like watching Hulu TV, you can set it as your home page. Once you launch the program, you can search your desired TV from Hulu.

(Hulu-T

V)

## 2. Step 2: Download YouTube video

Since this program can be taken as a web browser, you can search your wanted video on the YouTube search box or directly copy and paste the URL of the target video on the location sidebar. After that, the target video will show on the right sidebar in different formats and resolutions for you to download. Click the Download button  (Download-button) to download the video.

(Download-YouTube-video)

## 3. Step 3: View the downloading process

The downloading process will be shown under the button of “Downloading” Download online video. After taping the button beside the search box, you will see how long these videos will be finish downloading through the progress bar.

(View-process)

Here are more practical button for you if you right click the downloading file. When the file is downloading, you can tap **“Pause”** **“Start”** or **“Delete”** to control the downloading process of the file. **“Select All”** button is designed to choose all the downloading task. After that, you can set the same order to all the downloading tasks for saving your time. In addition, two button on the top right **“Start All”** and **“Pause All”** to make all the tasks start or pause on one click. Meanwhile, you can also open the video link with your default web browser by click **“Browse Website”** button.

(Pause-video)

If you want to go back to the video page you downloaded the video, click the Address Bar.

"**Refresh**"  button is for refreshing the page you are currently browsing.

Step 4: Check downloaded videos

You can click the “**Downloaded**” button besides “**Downloading**” to check how many videos have been finished. You can also set these downloaded videos’ order by Name, Size, and Length.

(Check-downloaded-video)

In addition, right click one of the downloaded files, many new options on the right-click menu will be showed to you. You can click **“Delete”** button to delete the chosen file. Or you can tap **“Select All”** to choose all the file firstly and then make other order to the all selected files at one click.

The downloaded file can be converted to any other formats and even can be edit by clicking **“Add to Convert”** button. Besides, you can also tap the **“Add to Burn”** button to burn the downloaded video to DVD or Blu-ray. As the name suggests, **“File Location”** button is designed for users to find the location of the downloaded files. Of course, if you want to view the video link on these interface, you can click **“Browse Website”** button to open it using the default web browser on your computer.

(Delete- video)
